

2012 Semi-annual Fire Inspections

This is the semi-annual fire inspection report for spring 2012.

We have concluded our fire inspections. We inspected fifty-seven buildings and businesses.

There were the usual typical violations: fire extinguishers not mounted or out-dated, blocked, etc. But as we noted from last inspections, 80% or so of the violations were dealt with. We have submitted a copy of these to Chief Flores and will keep a copy on file with the fire department.

Thank you.
